LIQUID DETOX

This special liquid dissolves chemicals of all kinds by breaking the chemical bonds into non-harmful molecules. Two or three drops in any beverage, hot or cold, will neutralize chemicals, microbes or harmful agents which might be in the beverage. You don't have to buy water or purchase expensive filtering units; five drops will purify up to one gallon of water*.

- Therapeutically, 10 drops placed directly in the mouth at least once each day will help the body detoxify chemicals, especially if they are in the blood or lymphatic system.
- Chemicals are in everything. It is impossible to avoid them all. We suggest therapeutic doses to help eliminate any accumulations coming from toothpaste, additives, preservatives, deodorant, soap, shampoo, and many other daily exposures.
- It also works wonders when used topically on insect bites, cuts and bruises, or any skin blemish. If you're not sure what to do, use Liquid Detox!

What does Liquid Detox Do?

- ✓ It increases cellular permeability allowing for higher uptake of available nutrients.
- ✓ It assists in the formation of healthy RNA and DNA (needed for all healthy cells).
- ✓ It increases enzyme activity by inhibiting toxic agents that block natural enzyme activity.
- ✓ It provides compacted micro-size solar energy formulated inside living cells.
- ✓ It acts as an electrolyte restoring electrical potential to cells.
- ✓ It provides general electrical balance to the body.
- ✓ It acts as an antioxidant.
- ✓ It acts as an anti-bacterial, anti-viral, anti-fungal and anti-parasitic if therapeutic doses are used.
- ✓ It increases the oxygen consumption of cell tissues. (Cancer, and most diseases, thrive where there is oxygen lack.)
- ✓ It can dismantle or absorb toxins such as herbicides, pesticides, hydrocarbons, heavy metals, radioactive pollutants, poison from insects and other environmental toxins.

Many people want to know what the ingredients of Liquid Detoxify are, but there are none to list. Liquid Detox is created in a process where special water is run through a machine that charges the molecules of water with organic minerals and an electromagnetic signature that gives it the wonderful attributes that it has. The water is then run through a process that gives it a very special frequency charge.
